

Appl. No. 10/507,046  
Amdt. Dated January 3, 2007  
Reply to Office Action of October 3, 2006

**Amendments to the Specification**

Please replace the paragraph 1, lines 16-19, on page 3 with the following replacement paragraph:

In a preferred embodiment of the present invention the anti-anti-idiotypic antibody is an antibody which reacts with the monoclonal anti-idiotypic antibody ACA125 produced by the hybridoma 3D5 (DSM ACC 2120), but in particular with the antigen CA125. The hybridoma 3D5 was deposited on March 3, 1993 under the accession number given by the international depositary authority DSM ACC2120 at DSMZ-Deutsche Sammlung von Mikroorganismen und Zellkulturen GmbH, Mascheroder Weg 1B, 3300 Braunschweig, Germany, fulfilling the Budapest Treaty on the international recognition of the deposits of microorganisms for the purposes of patent procedure.
